

MY LIFE PLAN

Name: Chodaton Luc

My Vision

I want to build my future step by step, with God at the center of my life. I have goals for my education, career, finances, and family, and I want to achieve them with faith, patience, and hard work.

1. Education and Career

My first goal is to earn my Bachelor's degree in Web Development. I want to improve my programming skills and build a strong career in technology. Studying while working can be challenging, but I want to stay focused, manage my time well, and complete my degree.

2. Work and Financial Stability

I am currently working, and I want to continue gaining experience while saving money whenever possible. My goal is to become financially stable and prepare for my future.

If I get a good opportunity to travel, especially for work or a better career opportunity, I will consider it. I will also pray for guidance before making important decisions.

3. Marriage and Family

After completing my degree, my main goal is to get married. I want to be financially, emotionally, and spiritually prepared for marriage.

I hope to build a family based on love, respect, faith, and commitment, with God guiding my decisions.

My Commitment

I know that I cannot control everything about the future, but I can control the effort I put into my goals. I will continue to work hard, save money, improve my skills, and stay committed to my education.

I will trust God and move forward with faith, patience, and determination.

My Overall Goal

My plan is to grow, become financially stable, get married, and build a good family while keeping God at the center of my life.
